
Our Moon

our moon - superteacherworksheets - our moon by cynthia sherwood jupiter and saturn have more than sixty moons each. neptune has thirteen. mars has two. but if somebody says "the moon," we know exactly what they're talking about. it's earth's moon, our closest neighbor in outer space. the moon is the second brightest spot in the sky, after the sun. **our moon in a new light poster - nasa ares** - minerals, js located on the moon's surface. spectrometers and other special instruments onboard orbiting spacecraft help scientists discover more about our moon than our eyes alone can detect. knowing where different rocks and minerals and chemical elements are located on the moon will help us plan our future exploration. **how our moon formed poster (front) - nasa ares** - much of our moon's history is recorded in the features you see when you look at the moon ... magna ocean impact debris slammed into the growing moon, 62 106 kilometers each impact heating it even more. this heat melted at least the outer part of the early moon, forming a magma ocean. gradually, the ocean cooled and the rocks of the moon's **the capture theory - parkway schools** - the capture theory the capture theory states that our moon was captured by the earth with the moon forming somewhere else. this means that at some point in time the moon's own orbit got close enough to the earth that the earth's gravitational pull "captured" it. **download the big splat or how our moon came to be a ...** - the big splat or how our moon came to be a violent natural history physics 'big splat' may explain the moon's mountainous far side 'big splat' may explain the moon's mountainous far side 3 august 2011 the mountainous region on the far side of the moon, known as the lunar farside highlands, may big splat or how our moon came to be - paraski2017 **poster: our moon in a new light - lpira** - poster: our moon in a new light . text and descriptions . mapping our moon! as we plan our journey back to the moon, it is important that we know where different types of rocks and minerals are located. apollo astronauts visited only six places—much of our moon still needs to be explored... seeing more **big moons and small planets! 1 - space math at nasa** - g moons and small planets! 1. this diagram shows the top-26 moons and small planets in our solar system, and drawn to the same scale. problem 1 - what fraction of the objects are smaller than our moon? problem 2 - what fraction of the objects are larger than our moon but are not planets? problem 3 **our companion the moon - faraday.uwo** - our companion: the moon! compare and contrast the earth and the moon. what are their differences in size, composition, atmosphere, geological activity, density, magnetic field?! how do craters form? how can we tell if one crater is older than another?! what was the period of heavy bombardment?! **tidal heating of moons - nmsu astronomy** - io is jupiter's innermost moon. it doesn't look like our moon since there are very few craters on io. this is odd because io is old and should have lots of craters. an infrared picture gives us a clue about what is happening. infrared light is like heat detection, so those spots that look like acne are very hot! **our solar system? what theory best explains the features ...** - rotation of uranus, earth's moon, etc. what theory best explains the features of our solar system? ¶! the nebular theory states that our solar system formed from the gravitational collapse of a giant interstellar gas cloud—the solar nebula (nebula is the latin word for cloud) ¶! kant and laplace proposed the nebular **exploring the moon pdf - nasa** - clues to how earth and the moon formed, the nature and timing of early melting, the intensity of impact bombardment and its variation with time, and even the history of the sun. most of this information, crucial parts of the story of planet earth, cannot be learned by studying rocks on earth because our planet is so geologi- **questions about the moon - nasa** - questions about the moon 1. why were the six apollo lunar sites chosen? 2. the apollo manned missions returned more than _ pounds of lunar rocks and soils to earth. 3. how long after the first manned mission which landed on the moon did the apollo missions end? 4. what is the age of the moon? 5. how many moons are in our solar system? 6.
